pH  
Acidity

## Don't guess – get the facts about your water quality

In Australia we have high-quality air and food, but our drinking water may be the cause of health battles now and in the future.

Contaminants like toxic chemicals, heavy metals, lead and pharmaceuticals can be absorbed into your food when cooking.

- Personal on-site testing at your kitchen tap
- Immediate results & expert explanation
- Solutions to get pure, great-tasting water
- Perfect for families & concerned homeowners

**BOOK YOUR TEST TODAY – Remove any doubt!**
